MATEE UR REHMAN

BS COMPUTER SCIENCE UNDERGRADUATE
Islamabad, Pakistan | mateeurrehman512@gmail.com
LinkedIn: www.linkedin.com/in/matee-ur-rehman-5a8a66357 | GitHub: github.com/Matee-ur-Rehman

PROFESSIONAL SUMMARY

Computer Science undergraduate with a strong foundation in programming, data structures, and database systems, paired with a growing focus on Artificial Intelligence and Machine Learning. Experienced in Python-based data analysis, exploratory data analysis (EDA), and building end-to-end AI/ML projects, including a chess engine, a research paper reproduction, and an AI-powered learning platform. Eager to apply analytical thinking and core ML concepts to real-world problems through an internship in an AI-driven or data-focused environment.

EDUCATION

BS Computer Science | COMSATS University Islamabad, Wah Campus
September 2023 – Present | Expected Graduation: June 2027

HSSC (ICS) | APSACS Pasban, Rawalpindi
August 2021 – July 2023 | Grade: A

SSC (Matric – Science) | APSACS Westridge III, Rawalpindi
June 2019 – July 2021 | Grade: A+

PROFESSIONAL EXPERIENCE

AI/ML Intern | Quantum Logics
Remote | 13 July 2026 – Present

- Contributed to StudyMind AI, the AI-powered learning solution of Quantum Learning Workspace, designed for personalized and interactive learning.
- Worked on the document ingestion and knowledge-processing pipeline, and implemented embedding-based representations for semantic retrieval of educational content.
- Contributed to the AI Quiz Generator, Weak Topic Detection, and Knowledge Graph modules.

AI/ML Intern | IST
On-site | 04 August 2026 – 15 September 2026 (six weeks)

- Completed a six-week internship focused on Artificial Intelligence and Machine Learning.
- Gained hands-on exposure to AI/ML concepts, Python-based development, and practical machine learning workflows.
- Worked on understanding data processing, model development, and the application of machine learning techniques.

PROJECTS

SleepMamba – Research Paper Reproduction
Technologies: Python, PyTorch, Mamba, Deep Learning, Scikit-learn

- Independently reproduced the SleepMamba research paper, implementing a multimodal deep learning model for automated sleep-stage classification using EEG and EOG signals.
- Developed the data preprocessing, model training, and evaluation pipeline on the Sleep-EDF-78 dataset, achieving 82.93% accuracy in the EEG+EOG, 5-epoch setting using subject-level 10-fold cross-validation.

ChessWala – AlphaZero-Inspired AI Chess Engine
Technologies: Python, PyTorch, Deep Learning, MCTS, Reinforcement Learning, PyQt6

- Developed an AI chess engine inspired by AlphaZero, combining a deep residual neural network with Monte Carlo Tree Search (MCTS) for intelligent move selection.

- Implemented supervised pretraining and self-play reinforcement learning, along with a desktop GUI featuring AI gameplay, move analysis, move classification, and accuracy scoring.

StudyMind AI – AI-Powered Learning Workspace
Technologies: Python, FastAPI, React, RAG, Embeddings, Vector Search

- Worked on an AI-powered learning workspace designed to transform PDFs, YouTube lectures, web articles, and personal notes into an interactive learning assistant.
- The project architecture incorporates Retrieval-Augmented Generation (RAG), semantic embeddings, conversational AI, and knowledge-based learning features.

Smart Institutional Operations and Information System
Technologies: Python, FastAPI, PostgreSQL, Flutter

- Developing an integrated web and mobile-based institutional management platform to streamline academic and administrative operations for administrators, teachers, students, and parents.
- Designing and implementing modules for homework management, examinations, results, fee tracking, timetables, academic calendars, announcements, and complaint management.
- Contributing to backend development, database integration, and cross-platform application functionality.

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript
Databases: MySQL, Relational Database Design, SQL Queries, MongoDB
Data & Analytics: Data Cleaning, Exploratory Data Analysis (EDA), Dashboarding, RAG Pipelines
Core Concepts: Object-Oriented Programming, Information Systems, Cybersecurity Fundamentals
Tools & Practices: Basic Automation, Structured Problem Solving

CERTIFICATIONS

- Introduction to Artificial Intelligence (AI) – IBM (offered through Coursera), July 2026. Verify: coursera.org/verify/LFA3Z3SG6GW7
- AI Kickoff Bootcamp – GDG: Focused on Python, Data Cleaning, EDA, Data Preprocessing, and Basic Machine Learning Concepts.

LANGUAGES

Urdu (Native), English (Fluent)
